

Stereo Box DS2

Stereo integrated amplifier with 5 inputs

MSRP 849 € (incl. VAT)

Incl. wood side panels MSRP 899 € (incl. VAT)

- Dual mono design principle
- Built-in phono pre-amplifier with MM & MC capability
- Other inputs: 3x analogue, 1x BT
- 4th generation BT with aptX capability & antenna
- Volume control with motor driven potentiometer
- Headphone output with dedicated amplifier stage
- Fixed & variable outputs for subwoofer or second zone amp
- Trigger In and Output
- Available in silver or black
- Wooden side panels in walnut or eucalyptus optionally available

Colour options:  

Real wood side panels:  

Power output: 2x 80 W / 135W at 8 / 4 ohms
Signal-to-noise ratio: > 85dB
Channel separation: > 65dB (@ 10kHz)
THD +N: < 0,03% @ 3W
Frequency response: 20Hz - 25kHz (max. deviation -0,1dB +0,2dB)
Analogue inputs: 3 pair RCA/Cinch sockets line
1 pair phono MM/MC input (RCA)
Input impedance: Line: 50kOhms, Phono: MM 47kOhms / MC 100 Ohms
Digital inputs: BT (aptX)
Speaker connectors: 4mm Ø banana plugs, spades connectors or naked wire
Headphone output: 6,3mm jack
Headphone impedance: 16 - 600Ohms recommended
Analogue outputs: RCA fixed, RCA variable, power amp, 6,3mm headphones (front)
Power supply: 36V/5,5A DC; 100 - 240V, 50/60Hz
Standby Power consumption: < 1W
Dimensions W x H x D: 206 x 71 x 240 mm (alu)
240 x 72 x 240 mm (wood)
Weight: 1770 g (Alu) without power supply
2000 g (Wood) without power supply

Stereo Box DS2: A new integrated stereo amplifier with class-leading sound & future-proof technology!

The Stereo Box DS2 is Pro-Ject's take on the classical integrated stereo amp. The focus is outstanding, unimpeded sound quality that is not held back by a overly cramped feature-set, where good sound gives way to more and more features that many customers may never need.

The Stereo Box DS2 provides excellent functionality without overdoing it. The pre-amp section includes a high quality phono stage, allowing you to connect turntables with MM or more demanding MC cartridges. Three RCA line inputs offer enough flexibility to add CD players, DACs and streaming devices to your system. The BT input is great for quickly getting your phone onto your speakers and brighten up your living room with warm background music.

The real star is the power amp section. The dual mono design principle is able to drive the best speakers out there and will make them come to life with powerful tran-

sients and a rich, wide and dynamic soundstage. The variable and fixed RCA outputs allow you to connect active speakers or a subwoofer. The 6,3mm headphone output on the front panel is driven by its own dedicated amplifier stage and has ample of headroom to drive the best sounding headphones. No corners were cut when designing the electrical curcuietry and this way, the relatively small and compact, Stereo Box DS2 can compete with much bigger and heavier integrated amps that cost many times more!

A great addition to the Stereo Box DS2 is the CD Box DS2. Together with this DAC and CD player, you can add all the digital connectivity you need and supplement your high-end vinyl experience with great sounding, modern digital sources. Unparalleled in value, a powerful stereo-set that covers the entirety of the analog and digital domains at a compact footprint that knows what matters most: a truly exciting musical experience!

The sandwich aluminium / metal casing is aesthetically pleasing and protects effectively against interferences. Stereo Box DS2 is available in silver or black with optional wooden side panels in walnut or eucalyptus.
