

## Product Series Announcement

### Jamo Studio 8 Series

#### Loudspeaker range with stunning sound and style, plus new Dolby Atmos® technology

*Didcot, Oxfordshire – 20<sup>th</sup> February 2018*

Henley Audio are delighted to announce that Jamo, a high-value, high-performance audio brand with Danish design principles and a Klipsch Group, Inc. brand, is back in the UK with the re-imagined Studio 8 speaker series, which has been a core part of the Jamo line for decades.

The new Jamo Studio 8 series combines innovative contemporary design, advanced acoustic technologies, and a balanced, natural sound performance at an attractive price for consumers.

The Studio 8 compact cabinet designs with thoughtfully positioned reflex ports and neat, modern feet are an ideal solution for urban living spaces around the world. Building on classic Jamo acoustics, the new Studio 8 Series brings high design and high performance to any budget. Sonically, the Studio 8 series employs 1" soft dome tweeters across the range, with WaveGuide technology for a dynamic, powerful sound performance. The stylish, aluminized polyfibre woofers deliver deep, accurate bass from a small footprint thanks in-part to the clever use of reflex ports.

Stylistically, extra attention to detail has been paid to ensure this series has a clean, seamless appearance whether you're purchasing for stereo or full home cinema purposes. The range consists of three floor-standing towers (the S 809, S 807 and S 805), two bookshelf monitors (the S 803 and S 801), two centre speakers (the S 83 CEN and S 81 CEN), two subwoofers (the S 810 SUB and S 808 SUB) and one Dolby Atmos® certified elevation speaker (the S 8 ATM); so a Studio 8 speaker system can be choreographed to cater for any living space or use application.

For the ultimate home cinema experience, Dolby Atmos®-enabled speakers deliver sound that comes alive from all directions, including overhead, filling any room with astonishing detail, and depth. The S 809, S 807 and S 803 models boast elegant, patent-pending conductive metal fasteners on the top of their cabinets that serve as terminals for the S 8 ATM Dolby Atmos elevation speaker. The S 8 ATM Dolby Atmos elevation speaker's metal feet innovatively align with these connectors so the back of the speaker has a clean design without the need to run additional cables up-to the

elevation module. The grilles on the S 809 and S 807 are also able to slide up and align with the front of the S 8 ATM to create one continuous line, free from visible inputs or wires.

The slim line, versatile 10" (S 810 SUB) and 8" (S 808 SUB) subwoofers can be placed vertically or horizontally against the wall, or even tucked on their side out of site underneath furniture. They each feature a bottom-mounted amplifier and 90° power plug for additional orientation flexibility and a clean look.

All speaker models in the Studio 8 range are available in three furniture-grade matte vinyl finishes with wood grain accents around the tweeters, at the bases, and feet, as well as trim rings to hide the driver fixings. The fully magnetic grilles also come in two unique colours – white speakers come with heather grey grilles, and the walnut and black speakers come with charcoal grey grilles, accentuating the clean, minimalist lines of this European design.

Some Studio 8 series speakers are available now through a specially selected network of UK dealers, with the full range arriving in April 2018.

# Jamo

### About Jamo

Since 1968, Jamo has utilised resources from around the globe while honouring its Scandinavian roots. Innovative in their design, Jamo loudspeakers seamlessly blend into any living environment. They are designed for life, delivering contemporary style and integrating high-value audio that reflects the different ways the world listens.

Jamo is owned by Indianapolis, Indiana-based Klipsch Group, Inc. Klipsch Group, Inc. is a wholly-owned subsidiary of VOXX International Corporation (NASDAQ: VOXX). Jamo is a trademark of Klipsch Group, Inc., registered in the U.S. and other countries.

### About Henley Audio

Everyone has a different interpretation of what good sound is, and at Henley Audio we're no different. We strive to bring customers the best possible selection of hi-fi equipment from a variety of international manufacturers.

Formed in 1997 as the result of a management buy-out of Ortofon UK, Henley Designs Ltd. (trading as Henley Audio) is one of the UK's premier distributors of quality hi-fi equipment. The brands we distribute are not only highly-regarded in their own right, but they also share a symbiotic relationship with other brands in our portfolio.
