

Product Announcement

Reloop TURN 5

A new direct drive alternative.

Didcot, Oxfordshire – 17th July, 2018

Henley Audio are happy to announce the immediate availability of Reloop HiFi's second turntable, the TURN 5. After the successful introduction of the TURN 3 in late 2016, the TURN 5 finds its niche in the market as a hi-fi grade direct drive turntable that doesn't break the bank.

TURN 5 is a precision-engineered, quartz-controlled direct-drive record player that adheres to the highest sound requirements. The sturdy, industrial chassis boasts a premium finish, accented by gold trim that sets the TURN 5 aside as a prestige piece of equipment.

Internally, the brushless direct-drive DC motor ensures a quick and powerful drive system with stable and smooth rotational power. Coupled to the dampening rubber base of the platter (which is also supplied with a rubber mat), the TURN 5's drive system is free from unwanted resonance, so the turntable can deliver excellent timing and detail in the sound performance.

To suit the widest range of record collections, the TURN 5 motor supports 33, 45 and 78RPM playback with a choice of three buttons on the top plate. For collectors who have a variety of cartridges to suit their record collection – such as 78RPM mono cartridges for shellac records, or a different type of cartridge for different musical styles – the TURN 5 is equipped with a statically balanced S-shape tonearm with removable headshell for easy cartridge changeovers. The tonearm system boasts a sturdy-yet-light frame with convenient anti-skate dial, adjustable VTA, a hydraulic

lift system and a heavy counterweight to suit a wide variety of cartridge/headshell combinations. In the box, the TURN 5 is supplied with an Ortofon 2M Red cartridge for high-fidelity playback from new.

The TURN 5 housing is a heavy-duty metal construction with shock-absorbing feet to eliminate unwanted vibrations. The rear-mounted gold-plated, phono-level RCA outputs with separate earth connection are recessed into the chassis for added protection and to facilitate easy cable upgrades. Elsewhere the TURN 5 is supplied with all necessary cables and accessories to get working out of the box, and the added convenience of a supplied dust cover ensures the turntable can be kept safe when not in use.

The TURN 5 is a premium hi-fi turntable that satisfies both practical and audio design requirements. Built to be convenient for a wide range of uses and to meet expected audiophile standards, the TURN 5 produces a sound signature that is present, direct and enveloping with exceptional timing and detail. It's a new must-consider direct drive option.

SRP £650.00

The Reloop TURN 5 is available in the UK now.

About Reloop HiFi

Reloop HiFi is a new division of Reloop, founded in 2016 with the introduction of the TURN 3 record player.

Based in Münster, Germany, Reloop are already a market leader in the world of DJ and Pro Audio equipment. Their in-house Research & Development team work with select manufacturing partners around the world to achieve the best possible balance of style, performance and price.

About Henley Audio

Everyone has a different interpretation of what good sound is, and at Henley Audio we're no different. We strive to bring customers the best possible selection of hi-fi equipment from a variety of international manufacturers.

Formed in 1997 as the result of a management buy-out of Ortofon UK, Henley Designs Ltd. (trading as Henley Audio) are one of the UK's premier distributors of quality hi-fi equipment. The brands we distribute are not only highly-regarded in their own right, but they also share a symbiotic relationship with other brands in our portfolio.
