

Product Announcement

Pro-Ject Stream Box S2

High-quality multi-room streaming from the masters of compact audiophilia.

Didcot, Oxfordshire – 21st February 2019

Pro-Ject Audio Systems, the Austrian manufacturer of multi-award-winning hi-fi products, are expanding their coveted Box Design range of hi-fi electronics in early 2019, reintroducing popular models with latest-generation aesthetics and technical characteristics. The Stream Box S2 (£215.00 SRP) is a brand-new addition to the range, joining the family as Pro-Ject's most affordable streaming solution ever.

The Stream Box S2 is a high-quality network audio streamer with support for high-resolution data up to 24-bit / 192kHz. With both ease of use and sound quality at its core, the Stream Box S2 makes playing your music easy – whether it's owned music stored on your phone or held on a NAS drive, or simply streamed using the world's most recognised subscription and internet radio streaming platforms.

Multiple Stream Box S2's can easily form a multi-room setup, while in addition two units can be connected to build a stereo pair (with assigned left and right channels). Alongside the wireless and wired network connection options there are also three audio output options; Fixed line-level (RCA pair) for use as a traditional source, variable (mini-jack) for use with powered speakers or power amplifiers, or digital (optical) transmission for connection straight to a dedicated DAC.

The Stream Box S2 is easy to set-up and add to the network, and is fully controlled by Pro-Ject's new free iOS and Android App, "Pro-Ject Stream S2". Boasting full Tidal integration inside the app interface and Spotify Connect built-in, radio fans will also be happy to learn that the popular TuneIn internet radio streaming platform is also built-in. There is also a Line Input, for introducing traditional sources to your streaming environment, and a USB input for playback direct from a USB hard drive.

The Stream Box S2 is the ideal solution when space is tight or budgets are limited. With a full technical specification and a world-leading analogue company behind it, the proposition of great sound and myriad features is something that's hard to ignore.

SRP £215.00

Stream Box S2 is available now in Black or Silver finish.

About Pro-Ject Audio Systems

Pro-Ject Audio Systems are widely recognised as one of the finest turntable manufacturers in the world. Their mission is simply to produce the best sounding analogue components at the most competitive prices possible. The current range spans a huge variety of price points, with a variety of products targeted to key demographics or to accommodate any of the modern listener's unique requirements.

Based in the Austrian countryside, Pro-Ject Audio Systems use specialised manufacturing partners to produce all their products, and the entire turntable range is assembled with great skill, care and attention in the Czech Republic.

About Henley Audio

Henley Audio has been importing and distributing industry-leading hi-fi equipment to the UK and Ireland since 1997. With a passion for great sound and a firm focus on brand integrity, we work to deliver excellence in both product and service.

Formed as the result of a management buy-out of Ortofon UK, Henley Designs Ltd. (trading as Henley Audio) operates in-house sales, marketing, service, support and warehouse teams in order to offer the full turn-key solution for suppliers. The brands we represent are not only highly-regarded in their own right, but they also share a symbiotic relationship with other brands in our portfolio.
