

Promotional Announcement

Roon Nucleus / Pro-Ject Stream Box S2 Ultra Bundle Deal

Turbo-charge your Roon experience with Henley Audio's new bundle offer.

Didcot, Oxfordshire – 12th September 2019

Henley Audio are delighted to announce a new promotion for customers interested in upgrading their listening experience to an environment controlled by the popular Roon music software, but delivered in the best possible fidelity.

For a limited time, all new Roon Nucleus (£1500.00 SRP) or Nucleus+ (£2500.00 SRP) purchases made through a recognised Henley Audio retail partner can receive £150.00 off the award winning Pro-Ject Audio Systems Stream Box S2 Ultra (£599.00 SRP).

In combination, the Nucleus and Roon Ready authorised Stream Box S2 Ultra deliver lightning fast Roon performance with the additional benefit of a USB detox process, improving the overall audio performance from your USB DAC. Pro-Ject's sophisticated transport is the ideal solution, allowing you to place the Nucleus server nearer your other computer hardware – rather than in your hi-fi rack – and itself is small enough to tuck away from view without complication. The USB detox creates a clean USB signal, almost entirely devoid of noise, for absolute clarity and fidelity.

The bundle offer is available as part of any new Nucleus or Nucleus+ purchase from an authorised UK reseller, and must be taken at point of order. The Stream Box S2 Ultra is available in black or silver finish.

SRP £1,949.00 (Nucleus & Stream Box S2 Ultra)

SRP £2,949.00 (Nucleus+ & Stream Box S2 Ultra)

The Roon Nucleus and Nucleus+ are available across the UK now.

To find your local Roon retailer, please visit www.henleyaudio.co.uk

Roon Nucleus and Nucleus+ Product Description

Nucleus is the center of your Roon music system. It's the housekeeper, the traffic cop, and the brain that takes care of the music in your life. Using Nucleus, Roon manages all your music – on hard drives, NAS, and streaming content – and allows you to play it on all the audio devices around your home. Nucleus is the best way to run Roon, at any price.

Just plug Nucleus into your network, connect your hard drives, download Roon remote apps (iOS, Android, macOS, Windows) and you'll be ready to play music using a wide variety of audio devices.

Aside from being a powerful, fanless music server, what sets Nucleus apart is that it's powered by Roon OS – a fast and lightweight operating system optimised to do just one thing: browse and play music. Roon is a multi-room, multi-user networked audio platform built to the exacting standards of audiophiles, so it offers features like bit-perfect playback, DSD and PCM upsampling, multichannel playback, and signal path display.

As well as distributing music throughout your home, Nucleus also offers the very finest performance possible when connected to a USB DAC. A computer source has never sounded this good before.

Pro-Ject Stream Box S2 Ultra Product Description

The Stream Box S2 Ultra is designed to bring high-end network connectivity to any USB-enabled DAC. Rather than having to consider expensive or inconvenient upgrades, the small size and attractive price of the Stream Box S2 Ultra means you don't need to change your system to enjoy wireless (or wired) streaming from any DAC with a USB input.

The USB output of the Stream Box S2 Ultra is meticulously engineered to offer the very best possible output signal. With its own dedicated internal power supply and premium components, the USB output "detoxes" the USB signal, removing noise and unwanted artefacts. The end-result is a sound presentation that is open, clean and detailed, but retaining the raw emotion of the music.

Foremost as a Roon Ready network streamer, the Stream Box S2 Ultra is effortlessly simple to integrate. It's instantly recognised by your Roon server once connected to a USB DAC, so you can transmit via Roon's bespoke RAAT protocol and experience the full Roon experience from any existing, non-Roon-certified equipment.

Second, as a universal network bridge it offers a sophisticated solution for building a small music server based on the popular Volumio platform. Volumio allows for playback from Spotify, Tidal, Shoutcast (Internet Radio) and Shairport (Airplay), as well as UPnP network services or attached USB hard drives. Controlled over IP via the responsive in-browser app, or by using Pro-Ject's own Pro-Ject Play Android app, the Stream Box S2 Ultra is easy to navigate and enjoy - delivering its class-leading digital audio output signal no matter how you choose to use it.

About Henley Audio

Henley Audio has been importing and distributing industry-leading hi-fi equipment to the UK and Ireland since 1997. With a passion for great sound and a firm focus on brand integrity, we work to deliver excellence in both product and service.

Formed as the result of a management buy-out of Ortofon UK, Henley Designs Ltd. (trading as Henley Audio) operates in-house sales, marketing, service, support and warehouse teams in order to offer the full turn-key solution for suppliers. The brands we represent are not only highly regarded in their own right, but they also share a symbiotic relationship with other brands in our portfolio.
