

Pro-Ject Uncovers Polar Blue edition of Colourful Audio System 2

Pro-Ject's flagship ready-made vinyl system gains a cool new Polar Blue finish

Didcot, Oxfordshire, UK, 21 October 2025: Pro-Ject has taken the wraps off a new Polar Blue finish for its Colourful Audio System 2. The system delivers a complete, curated vinyl setup presented in one convenient package, containing a Pro-Ject Debut EVO 2, a black Pro-Ject MaiA stereo amplifier, and Speaker Box 5 S2 loudspeakers. Every set comes with all the premium cables made and handpicked by Pro-Ject, making the system fully complete – the listener can unbox it, set it up in minutes, and start exploring the world of vinyl.

Forming part of Pro-Ject's *Sets* line, the Colourful Audio System 2 offers a matched collection of components, ideal for listeners who want to enjoy high-quality vinyl playback without the complexity of system building. It's designed for both newcomers and returning enthusiasts who value expert system synergy, simplicity, and sleek design. Another great feature of Pro-Ject's *Sets* systems is that they work beautifully as they are, but thanks to Pro-Ject's extensive range, listeners can upgrade and expand their system over time, building on a strong foundation to make it even better.

Pro-Ject Debut EVO 2

The Debut EVO 2 builds on the legacy of its predecessor with refined styling and improved performance. Handmade in Europe, it focuses on the essentials that make a turntable sound exceptional: precision engineering, premium materials, and expert craftsmanship. A robust MDF plinth, balanced platter, and upgraded motor suspension ensure quiet, stable playback and clear, natural sound.

Pro-Ject MaiA S3

The MaiA S3 integrated amplifier includes a built-in phono stage for the Debut EVO 2, high-quality Bluetooth 5.0 with aptX HD for wireless streaming, and multiple digital and analogue inputs. Compact yet powerful, it delivers detailed, dynamic sound that easily fills a room.

Pro-Ject Speaker Box 5 S2

Delivering a spacious soundstage, the Speaker Box 5 S2 bookshelf speakers combine a 25mm silk dome tweeter with a 130mm fibreglass cone woofer. The result is clear, sparkling highs and full-bodied mids with tight, punchy bass. Constructed in Europe from high-quality, eco-friendly materials, these speakers offer impressive performance and long-lasting reliability in a compact design.

Connect it LS E & Connect it E Phono 5P RCA & Damp it

Pro-Ject includes premium accessories to complete the system. The Connect it LS E speaker cables use solid-core oxygen-free copper for precise, neutral signal transmission, while the Connect it E Phono interconnect features a dual twisted-pair design with full shielding to prevent hum and interference. To reduce unwanted speaker vibration, the system includes six Damp it isolation feet (three per speaker) to stabilise the Speaker Box 5 S2 and improve overall clarity.

About Henley Audio

Henley Audio has been importing and distributing industry-leading hi-fi equipment to the UK and Ireland since 1997. With a passion for great sound and a firm focus on brand integrity, it works to deliver excellence in both product and service. Formed as the result of a management buy-out of Ortofon UK, Henley Designs Ltd. (trading as Henley Audio) operates in-house sales, marketing, service, support, and warehouse teams to offer the full turn-key solution for suppliers. The brands it represents are highly regarded in their own right and share a symbiotic relationship with other brands in its portfolio.
