

Product Announcement

WiiM Vibelink Amp

Expanding high-fidelity sound to all systems

Didcot, Oxfordshire – 18th March 2025

WiiM, the global technology company delivering premium audio experiences through simple, sleek, affordable, and high-performance products, today officially announces the Vibelink Amp.

First shown at the Bristol Hi-Fi Show 2025, Vibelink Amp is a powerful, 100W per-channel (8Ω), integrated amplifier that stands apart from other products in the WiiM range as it's the first product in the family to not feature built-in wi-fi streaming. In this way, it is the perfect complement to the popular Mini, Pro and Ultra streaming products, as it allows users to combine their first-class streaming technology with WiiM's most powerful, and complete amplifier solution yet.

"As our user base continues to grow, we've listened closely to the needs of our community," said Dr. Lifeng Zhao, CEO of WiiM. "Many audio enthusiasts love the flexibility of streaming but don't always want or need a connected amp. For those using devices like the WiiM Mini, Ultra, Pro, or other streaming solutions, we wanted to offer an amp that delivers exceptional sound quality and power without the need for Wi-Fi connectivity. This new design gives our customers more choice—allowing them to integrate seamlessly into their setup while still enjoying the rich, pure audio experience we're known for."

Vibelink Amp key features include:

- ✓ Pure integrated amplifier.
- ✓ Powerful 100W per-channel output (8Ω).
- ✓ ESS ES9038Q2M DAC supports 24-bit/192kHz digital audio.
- ✓ Analogue and digital inputs.
- ✓ Sturdy build and efficient design.

Vibelink Amp: £319.00 SRP

Available in Space Grey or Silver finish. Stock begins shipping during April 2025.

Vibelink Amp *in detail*

The Vibelink Amp is the ideal amplification solution for existing WiiM streamer owners, offering powerful output and a high-quality sound. It's also an ideal cosmetic match for the WiiM Ultra, making a system that offers unrivalled flexibility and ease of use.

Premium Audio Quality

Boasting 100W per-channel into 8Ω speakers (200W @ 4Ω), this two-channel Class-D integrated amplifier provides room-filling sound, capable of handling complex soundscapes and details without distortion.

Featuring a premium built-in ESS ES9038Q2M DAC, the Vibelink Amp ensures the highest fidelity from your digital sources, dynamically supporting variable sample rates and bit depths for optimal sound. It also handles analogue inputs with ease, offering a versatile solution for any audio setup. All built around the proven TI TPA3255 Amp Chip, the resulting clean, rich sound brings out the nuances of every note - ideal for audio enthusiasts who appreciate lifelike, studio-quality sound.

Flexible Options for Seamless Integration

Having both analogue (RCA) and digital (Optical, Coaxial) inputs allow users to connect with a range of audio sources, from classic turntables to the latest streaming devices, offering an upgrade on the sound achieved by many built-in DACs.

Smooth, Uninterrupted Listening Experience

The anti-pop noise design prevents sound interruptions when switching inputs or adjusting settings. Achieved through hardware optimisations like ramping circuits and software sequencing, ensuring no pop noise even when audio resolution changes. "Pop" noise is where many existing power amplifiers suffer.

Built-to-Last

Specially designed with copper heat pipes, a large aluminium heatsink, and a heat-spreading case to reduce hot spots and effectively manage the internally generated heat, the Vibelink Amp also features PID-based thermal management software to ensure optimal temperature regulation.

The quality of the overall design then passes through to the sturdy connectors and on to the aluminium oxide casing, which both supports the heat management system and looks elegant in any modern environment.

The WiiM Standard

The compact form factor of the Vibelink Amp is another shining example of how WiiM make products to support the modern listener's needs. This state-of-the-art amplifier delivers exceptional audio performance with both digital and analogue inputs, offering versatility for any setup. Engineered for seamless integration into the WiiM ecosystem, it pairs effortlessly with all WiiM streamers—including the WiiM Ultra, which shares the same compact design for easy stacking, as well as the Pro Plus, Pro, and Mini—to deliver outstanding multi-room audio.

Technical Data:

- **Amplifier**
 - 2.0 CH Class-D digital amplifier
 - Max Power: 100 W/channel (8 ohms), 200 W/channel (4 ohms)
 - Terminating Impedance: 2.67~8 Ohms
 - Built-in DAC: ESS ES9038Q2M
 - Amplifier Chip: TI TPA3255
 - Operational Amplifier: TI OPA1611
- **Audio Input**
 - Analog (RCA), or digital (Optical, Coaxial) ports supporting up to 24-bit/192kHz.
 - Anti-pop noise design for variable sample rates and bit-depth
- **Audio Output**
 - Stereo Banana Plugs.
 - SNR: 120 dB (A-weighted)
 - THD+N: -105 dB (0.0005%)
- **Power Adapter**
 - 100~240V AC, 4.5A Max
- **Other Features**
 - Premium Build Quality: Aluminum oxide casing, innovative heat dissipation technology.
 - Adaptable Digital Input: Seamlessly manage variable sample rates and bit depths to prevent audio pops.
 - 12 V Trigger: Activate/deactivate your amplifier instantly, offering quick activation and energy-saving standby mode.
- **Physical**
 - Dimensions: 7.9 x 7.9 x 2.58 inches (200 x 200 x 63 mm)
 - Weight: TBA
 - LED: 3-color LED indicates status and source
 - Buttons:
 - Volume knob with Min/Max indication
 - Press button for switching sources

About WiiM

WiiM is a global and US-based technology brand that delivers premium audio and smart home experiences by seamlessly integrating AI connectivity into everyday devices. Equipped with an intuitive voice-user interface, advanced audio streaming capabilities, and innovative audio and smart home solutions, WiiM empowers users to revitalize their beloved tech products. The company's mission is to offer high-quality audio and smart home solutions that are universally compatible with all your existing devices. WiiM consumer products have earned widespread acclaim, amassing numerous awards and establishing themselves as top sellers in the market.

About Henley Audio

Henley Audio has been importing and distributing industry-leading hi-fi equipment to the UK and Ireland since 1997. With a passion for great sound and a firm focus on brand integrity, we work to deliver excellence in both product and service.

Formed as the result of a management buy-out of Ortofon UK, Henley Designs Ltd. (trading as Henley Audio) operates in-house sales, marketing, service, support, and warehouse teams in order to offer the full turn-key solution for suppliers. The brands we represent are not only highly regarded in their own right, but they also share a symbiotic relationship with other brands in our portfolio.
