

# E.A.T. Phono Stage Says: Let It Glo, Let It Glo, Let It Glo

***European Audio Team E-Glo II hybrid tube design phono stage is now on sale in the UK***

**Didcot, Oxfordshire – 22 November 2024**

Henley Audio is thrilled to announce the immediate availability of the E-Glo II phono stage in the UK. The E.A.T. (European Audio Team) E-Glo II is a cutting-edge design that maximises performance from any cartridge while giving your vinyl system a stylish glow-up with its striking visuals. It is designed for audiophile-grade sound quality and sleek, luxurious aesthetics, and its chic aluminium casing beautifully complements its six-tube design.

## **Key Features of the E.A.T. E-Glo II:**

- Adjustable impedance and capacitance
- External power supply with a custom-made toroid transformer
- Flagship model with luxury build-quality
- Fully balanced input stage with Lundahl step-up transformer
- Fully passive, split equalisation stage
- Hybrid tube design with ECC83 & ECC88 tubes
- MM & MC Compatibility
- Premium components, including Mundorf capacitors and connectors

The E-Glo II stands out with its all-tube – or ‘valve’ – design, incorporating four ECC83s and two ECC88s. Widely regarded by audiophiles for their exceptional performance, these tubes offer easy replacement options and the flexibility to experiment with different tube types.

The E-Glo II ensures peak performance with a fully balanced input stage featuring a Lundahl LL1932 step-up transformer. Offering 45dB of gain, the LL1932 boosts output and audio quality. Its split, entirely passive equalisation stage enhances efficiency, putting less pressure on the valves, resulting in low-noise output and more gain options than typically achievable with pure valve phono stages.

Premium components, such as Mundorf output and WIMA capacitors, further elevate performance. The E-Glo II offers adjustable capacitance loading for moving-magnet cartridges and continuous resistance adjustment for moving-coil cartridges, making it compatible with many setups.

For quiet operation, the E-Glo II uses an external power supply with a custom toroid transformer, which is double-shielded to prevent interference and ensure clean power. The design also includes noise-reducing resistors and high-quality capacitors to isolate the phono stage from electromagnetic disruptions further.

Visually, the E-Glo II is as stunning as it is functional. The maker houses the tubes in a sleek chassis with heat sinks that echo the design of a reel-to-reel tape deck. The option to select the colour of the LED lights illuminating the valves adds an individual touch. Front-mounted switches allow for easy adjustments to settings, so users can fine-tune their setup without needing to open the unit.

The E.A.T. E-Glo II combines exceptional sound quality with a striking design, making it an ideal choice for audiophiles and design enthusiasts alike. Priced at £7,999.00, it is available now in the UK. Henley Audio exclusively distributes E.A.T. in the United Kingdom.

## Notes for Editors

European Audio Team

### About European Audio Team

European Audio Team invites you to experience the delights and revelations of music through high-quality components created by those who love music as much as you do. Offering a range of turntables, pick-up cartridges, phono stages, and amplifiers, among other accessory products, they deliver premium solutions that effectively combine class-leading technical performance with exceptional design characteristics.

European Audio Team is a Slovakian company owned by industry expert Jozefina Lichtenegger, now operating from neighbouring Austria. All E.A.T. products are made in Europe to exacting standards.

### About Henley Audio

Henley Audio has been importing and distributing industry-leading hi-fi equipment to the UK and Ireland since 1997. With a passion for great sound and a firm focus on brand integrity, it works to deliver excellence in both product and service.

Formed as the result of a management buy-out of Ortofon UK, Henley Designs Ltd. (trading as Henley Audio) operates in-house sales, marketing, service, support, and warehouse teams in order to offer the full turn-key solution for suppliers. The brands it represents are not only highly regarded in their own right, but they also share a symbiotic relationship with other brands in our portfolio.
