Lost In Romance is a unique album that combines Lyn Stanley's vocals with 13 of Los Angeles' best jazz musicians performing in four different trios along with soloists. The album is best appreciated when heard in song order. The songs include traditional Great American Songbook tunes, but also step into Blues and even Broadway classics. This album received a lot of positive reviews, two representatives are listed below:

"However you hear it, Ms. Stanley and the album are welcome throwbacks to the era of high concept album-making and gutsy, on-mic performance purity. ... she's 100 percent in her element to navigate a perfect landing on this impressive in every way debut. ... **You will not hear a more naturally recorded female voice than you'll hear on the record.** ... *Lost In Romance* is one album where the outstanding sound is matched by the music making." Music = 9/11; Sound = 11/11 Michael Fremer, AnalogPlanet.com.

"That's just plain 'Wow, Wow, Wow.' How brave you are to undertake these tunes. ... We get a lot of first-time albums with new artists, some of them pretty promising, but once in a blue moon you get the perfect package. Great singer, great arrangements, great tunes — and that's what it is with Lyn Stanley and her debut LP, *Lost in Romance*." — Gregg Hunter, Niteside
