

BEST HI-FI ACCESSORY

Pro-Ject VC-S

DRY CLEANING YOUR vinyl with a brush or cloth is all well and good, but never really gets rid of all the dirt that has sunk deep into those grooves. The only way to ensure your records are in tip-top condition is to give them a wet clean with a dedicated record-cleaning machine. Such devices typically cost a small fortune, until now. Pro-Ject's VC-S spins your disc in both

directions to ensure any cleaning fluid that's applied is properly removed, while its high-powered vacuum dries vinyl in just two spins. Discs sound every bit as clean as they look.

PRODUCT DETAILS

PRICE £300

TYPE Record cleaner

WEIGHT 10.5kg
