

BEST VALUE TURNTABLE

Pro-Ject Audio Systems X1

FURTHER ADVANCING PRO-JECT Audio Systems' turntable range, the X1 pays homage to its debut model from 1991. It employs a plinth made from a low-resonance MDF material partnered with a 1.5kg acrylic platter and AC synchronous motor with three-speed control. The deck is packaged with the company's Pick-IT S2 MM cartridge – developed with Ortofon – and fitted to one of its 8.6in carbon/aluminium tonearms. The X1 recreates a sound that's wide in scale and

surprisingly deep too, lending most music on vinyl a really immersive feel. More than just a worthy successor to the original, the X1 is a highly accomplished design in its own right.
