Loewe **stellar** alu black + lava

The craft design TV with Loewe dual channel dr+

Home-made OLED module

The latest generation and technology of OLED open cells with master black polarizer offer highest brightness and unparalleled motion picture performance in Ultra HD resolution.

The OLED module is designed, engineered and tailored by Loewe in Kronach with alu-compound back-forming, massive alu frame and real concrete or aluminum back-cover.

Pre-calibrated in our factory and supporting HDR 10+ Adaptive, these displays meet all relevant filmmaker picture and colour standards for a perfectly natural and impressive movie reproduction.

Loewe dual channel dr+

Equipped with a dual channel chassis, double triple-tuners and a large SSD, the Loewe dr+ system offers multiple viewing and recording possibilities from EPG programmed recording to spontaneous timeshift functions.

Tuners for DVB-T2/C/S2 HD and a easy accessible CI slot support various reception and recording scenarios. The Solid State Drive is perfect for video applications and both energy efficient, extra fast and absolutely noise-less for maximum comfort.

Tizen OS

The premium Tizen OS version 8 is a most convenient and fast smart operating system. The app store offers an extra-large selection of smart apps and a rich variety of video-on-demand services, including e.g. Netflix, YouTube, Disney+ and more.

The system is also compatible with advanced networking features: The support of broad-used dlna, Miracast and others allow comfortable content sharing and control via the home network.

Flexible connectivity with HDMI 2.1 including Ultra HD @ 144 Hz VRR ensures full support of latest game consoles on all four HDMI inputs.

Integrated sound bar and magic.light

An impressive 80 watts front-firing soundbar behind a high-gloss black spray painted metal speaker grill in harmony together with the Loewe signature.ring and the Loewe magic.light - for a discretely welcome and farewell animation or an atmospheric illumination during movie watching.

Simply adjust it as desired in any colour of the rainbow, at different brightness and saturation levels, by the touch of a button on the Loewe stellar remote.

Design craftsmanship

Sophisticated craft design and clever construction details from the in-house Loewe design and innovation studio.

Created with selected real materials like a four-sided brushed full aluminum frame in a diamond-cut shape, real glas-fiber enforced concrete or aluminum on the back panel and a rotatable table stand made of massive aluminum with a fine hairline-brushed finish. The real concrete back-cover gives each TV its unique fingerprint.

Cooled lava is milled into the finest rock flour to colour the concrete black. It is then additionally protected by a separately applied coating of sealer. The fine brushed aluminium profile of the display frame is anodised in a special process to a glossy black finish.

Sophisticated setup solutions

The Loewe magic.motion feature rotates the TV set on the motorized optional Loewe floor stand motor stellar by a touch of a button on the remote control up to 45° left or right - absolutely silently and smooth.

Of course the floor stand is also made of massive aluminum with a fine hairline-brushed finish. The optional floor2ceiling stand creates a spectacular free-floating 360° presentation, the wall mount stellar allows an extra slim wall solution.

All connections are hidden, and all cables are well guided and hidden by the integrated cable management plus cable covers in the all black rear cabinet. The solid VESA bolts support any mounting solution.
