## Stable installment of a cartridge

This set of anti-magnetic precision screws is essential for a correct and stable mounting of a cartridge. With Mount it you will be able to install a multitude of different cartridge types on your tonearm or headshell.

A correct and secure mounting of a cartridge is especially

important for a distortion free sound. The anti-magnetic allen screws of the Mount it set guarantee, that no electrical interaction to the cartridge-spools and magnets is produced. With this the cartridge can work clean and precise. The Mount it sets consists of three different sized screws to ensure that all common cartridges are covered.
